

PHOENIX GROUP

Government & Corporate Support Services

Press Release

April 16, 2015

For Immediate Release

Phoenix Group is proud to offer TAVALSS

Phoenix Group of Virginia, Inc. (Phoenix), a Service-Disabled Veteran-Owned Small Business (SDVOSB) based in Chesapeake, VA is proud to announce the addition of TAVALSS to our comprehensive lineup of new and innovative first responder solutions.

Total Asset Visibility and Logistics Support System (TAVALSS) is an inventory and personnel management system designed to maintain a comprehensive inventory of all assets at all times. Tools and equipment, whether in use or in storage, can be tracked and updated in a user-friendly interface.

TAVALSS offers a versatile database system with customizable modules to capture all necessary data users may require, including but not limited to purchase dates, issues and return dates, expiration dates, asset location, cache maintenance scheduling and tracking features, and can be modified to track much more.

Urban Search-and-Rescue (US&R) involves the location, rescue (extrication), and initial medical stabilization of individuals injured during disasters. Teams need to be able to be deployed to disaster locations quickly and effectively. Knowing the location and condition of gear is vital to rapid activation and deployment times. TAVALSS ensures these variables are available.

Phoenix Group continues to provide Urban Search and Rescue teams with equipment and innovative products geared towards making search and rescue missions as quick and effective as possible.

TAVALSS provides an effective solution to maintaining comprehensive inventories while preparing for, deploying to, and rehabbing after disasters and catastrophic events.

Phoenix Group's mission is to be a recognized leader in providing innovative solutions to the most challenging problems of government and commercial businesses across the globe. We make a positive difference by merging our experience with integrity and excellence, and always exceed expectations. Phoenix Group is looking forward to offering this product to all US&R and Fire Department entities interested in extensive inventory tracking through a simplistic, user oriented system.
